List of Harvest Moon games

**Generations series**

The first and current harvest moon series of games developed by Natsume, the developer of the Harvest Moon series, released in November 2006 for the Nintendo DS under the title Harvest Moon: Friends of Mineral Town, also known as Harvest Moon: The Great Harvest. This was the first Harvest Moon game to have a different developer than the developer of the original Harvest Moon games. Unlike previous games, Harvest Moon: Friends of Mineral Town is not an RPG, but rather a simulation/management game where the player takes control of the town of Mineral Town. While the developers of this game tried to keep as much of the same gameplay and storyline as the Harvest Moon series, the game has elements from other simulation/management games such as SimCity, and lacks some aspects of the Harvest Moon series. It is also one of the few Harvest Moon games to lack a shop in the beginning of the game, as it is at the end of the game. The series continues with the Harvest Moon: Animal Parade (2008) and its spinoff Harvest Moon: Tree of Tranquility (2010), both of which were released for the Nintendo DS. The Animal Parade edition was only released in Japan, while the Tree of Tranquility edition was released in English and other languages including Spanish, German, Portuguese, and Chinese. In 2013, Natsume released Harvest Moon: A New Beginning for the Nintendo 3DS and Wii U. The game introduced some new gameplay elements, as well as the addition of the Love Interest feature to the Harvest Moon series. The game was later released for PC, Mac, and Linux in 2015. An updated version, Harvest Moon: A New Beginning Plus, was released for the PlayStation 4 and Xbox One in 2017 and for the Nintendo Switch in 2018. Another spinoff Harvest Moon titled Harvest Moon: Evergirls and Harvest Moon: Everboys developed by Marvelous AQL, which was released for the Nintendo 3DS in 2015. A PlayStation Vita port was released in 2016.
