About This Content

Our story begins with the death of Gustav Platte, your father's older brother. In this world, he was a strong and dour man, who had seen much of the world and partook in his fair share of sins. None will dare to guess what awaits him in the next world. Through the many festivities he participated in he never seemed to revel in them. His eyes held a heaviness only matched by the weight of his flail. Some joked that this heaviness suggested the man had passed through Iron Forest. And at times it was hard to say, whether they were jokes at all.

The tale begins with a death, but it will not be last before the story's conclusion.

Gustav's estate was divided in accordance with his will. Felsen Castle and the adjoining villages passed into your brother's ownership. Other relatives partitioned the estate of Ludahof, the land and a fortune worth several thousand guildens. You, however, inherited just a sword and a small casket. You opened the latter to find two objects.

The one was a metal oak leaf similar in size to a real one. At first it seemed a decoration to you but you knew the difference between silver and steel. The edge pierced your hand and you wondered who would make a decoration that could wound? Curious, you scrutinized the leaf closer. The veins were so thin, its folds and imperfections so true to life. The spots and the play of shading was unlike any engraving you had ever seen that there was no doubt in your mind that this was not made by a human hand...

The other object inside the casket was a map.

The best Civ game in my opinion! I'm such a huge fan of the aliens and adapting to live on an alien planet. Unlike the other titles you won't be starting from a primitive age and discovering things like pottery or math, instead you will be discovering future and alien technologies.

Depending on your playstyle and choices your cities and units evolve in certain ways, becoming more or less integrated with the aliens. This is such a cool feature that we haven't seen so far and I love it!

The core features are still present with a slight twist to fit the lore of the game but if you like the previous games and also like Sci-fi then I'd highly recommend this to you.

Fyi, the Rising Tide DLC improves the game significantly, it is highly suggested.

6/10 without the dlc

8/10 with.. This DLC is really coll. I literally just skipped every boss in this game with this character.

what the \u2665\u2665\u2665\u2665. A very short adventure game that has a Mighty Boosh style of humour, I've never seen it on sale, but I'd say it's worth the full price. Don't look at any videos or screenshots since it's so short -- everything will be a spoiler.. Zen kind of atmosphere as the sprite nurtures the nature.

Artwork and Audios are pretty well done.

A real short story where chapters are just few steps apart.

The tiring control of 'Dragging' and clicking around, circling the zone searching for puzzle pieces were the tedious part.

Main attraction for me are the Background Items of Skies and the Moon.

Neutral Recommendation,

where I might say most would not enjoy the game.. Keyboard version is too hard. A game with so much promise gameplay wise but the developers failed to deliver with better online offerings(GGPO) and with none of the added characters that were promised.. It does make the trees look more realistic... Now, when you screw up a take-off, as you crash thru the tree's, they look better.... Not worth the money.

I like this game for 3 reasons.

1. It has cool maps and environments for your character to roam around and kill people in.
2. Classes that fit in with the game and that have their own unique attacks, style, and look.
3. It's a fun challenging game for everyone to play for everyone to play.

I recommend this game to everyone who likes these types of games or who just like playing games. It's a great game but it just needs help growing. This is what this review and the other reviews are for.. Very good story that describes the slacker lifestyle in one story and the sociopath sales in the other. The little details the story takes from answering a very general personal finance survey at the start put me in an accurate existence bin. Which made me realize, how so many probably are in the same boat. A sobering game about indulging fantasies of a family member while wealth and income degrade. It's a mature drama and I recommend it.. **PUBLIC SERVICE ANNOUNCEMENT for LINUX OS:**

Works with minor instability on a 970m (at the time of writing/testing); with Proton 4.2-5, Vulkan 1.06, and Nvidia vulkan drivers 430.14; Expect crashes when switching/ending skirmishes rapidly, other than that runs fine with no other issues.

If you'd like to utilize Blitzkrieg:

-go to settings

-Steam Play

-Enable Steam Play for all other titles

-You may now install the Blitzkrieg mod from the Steam Store

-Go to Library and select Company of Heros (the non-legacy version) Properties

-Set Launch Options

-put in these commands: -nomovies -mod Blitzkrieg

-this will force Company of Heros to launch Blitzkrieg with out the modlauncher, you will not be able to play Multiplayer unless your comrades also do the same commands.

If you would like to disable Blitzkrieg/play vanilla multiplayer simply delete the commands and the program will run as normal.. If Sonic was Axe's pet, this game would be Axe.. Relaxing music as you stand in a fish tank

Didn't really care for it. But it's fine for what it is.

you pretty much know if you're gonna like this or not.. this game was fun, i also liked that you could resize the window
